FINANCIAL AND COMMERCIAL,

FRIDAT. August 4.

On Monday sales of stocks amounted to less than 125,000 shares. Yesterday the total approximated 72,000 shares after successive increases in activity in the intervening days, and as the turn-over was greater yesterday so the pace of the reactionary movement which set in Tuesday was much faster. As on 100,000 shares of the reactionary movement which set in Tuesday was much faster. As on 100,000 shares of the reactionary movement which set in Tuesday was much faster. As on 100,000 shares of the reactionary movement which set in Tuesday was much faster. As on 100,000 shares of the reactionary movement which set in Tuesday was much faster. As on 100,000 shares of the reaction of the reaction of the reaction of the shares of the reaction of the re BARING BROTHERS & CO., Ltd than might be attributed to scattered Neither could the liquidation be induced by reports of damage to crops, for there has hardly been enough in these reports to start an argument. Other reasons suggested in the financial district to-day

may be similarly dismissed as without substantial foundation except for the suggestion that the stocks may have come from men of means who have long been carrying considerable quantities and have latterly been prompted to dispose of them out of sheer disgust with the activity of public officers and politicians in proceedings to disrupt business relations. For weeks the market has seemed to be indifferent to these proceedings, for every one appreciated that anti-corporation clamor was inevitable, as politicians | RAILROAD AND OTHER SHARES. were laying their courses in a year preceding a Presidential election. But it is doubtful if very many men anticipated such intense zeal as politicians of both parties have displayed in their investigaions and prosecutions. Officers of the National City Bank, for example, could not have foreseen the opposition that has been aroused by the formation of the City Security Company, else the transaction would not have been undertaken. at least at this time. Moreover, every LONDON CHICAGO day brings news of some new proceeding. like that against certain bituminous coal roads to-day, and the general tendency

of all these is to instil a spirit of conser

To-day's decline, the most abrupt of the week, brought the average price of the statistical railroad stocks more than \$4 a share lower than at the close last week. In the same time the average of the statistical industrials has dropped \$3 a share. In the previous days of the reactionary movement Steel common had been comparatively steady; to-day this stock declined 2% points in the course of transactions aggregating nearly 200,000 shares. There was no unfavorable trade news to encourage selling of the stock and nothing whatever of unfavorable influence unless the Stanley investigation and the prospect of a suit against the company under the Sherman act might be considered unfavorable factors. The crend of the investigation and the prospect of litigation have, however, been appreciated for some time. On the curb Standard Oil stock was again weak, but American Tobacco recovered more of the loss sustained when the passing of the dividend precipitated the downward movement in the general market. An interview with

Mr. McReynolds, who has been most active in the prosecution of the American | Tobacco Company, and the conference between counsel for the company and the court and attorneys for the Government held out the hope that the greatly involved affairs of the company would be adjusted more speedily than had been expected. Trade opinions as presented by the retail trade papers were diverse. Dun's notes a moderate betterment. Bradstreet's sees considerable irregularity due to cautious-
